## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2 and 3 each teach the term "selected from the class including". Since this term would include groups outside of those listed in the claim, the scope of the claim is uncertain. Proper terminology would be "selected from the group consisting of".

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1712

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Tessler (4098997).

Tessler teaches a solid reaction product of starch and a compound which forms acetal cross-links such as propiolate esters, in aqueous mediums (Table I and Examples). The listed starches would be within the molecular weight of the polyhydroxy compound taught in the present claims. Applicants intended use as a wellbore fluid does not distinguish over the prior art (In re Pearson 181 USPQ 641).

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 6-8 are allowable over the art of record.

7. Applicants amendment overcomes the rejection over Blouin and Green, since in the formation of the acetal cross-linked materials therein, a pH of as low as 1 may be used. The products must therefore be acid stable, and would not degrade under acidic conditions as in the present invention. Applicants arguments state that claims 2 and 3 had been amended in order to

Art Unit: 1712

overcome the rejection under 35 USC 112. However, the claims were not amended. A new rejection is presented in view of the limitation added to claim 1.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
